

Tech Note 50: Convert Multi Page PDF to Singles

September 2009

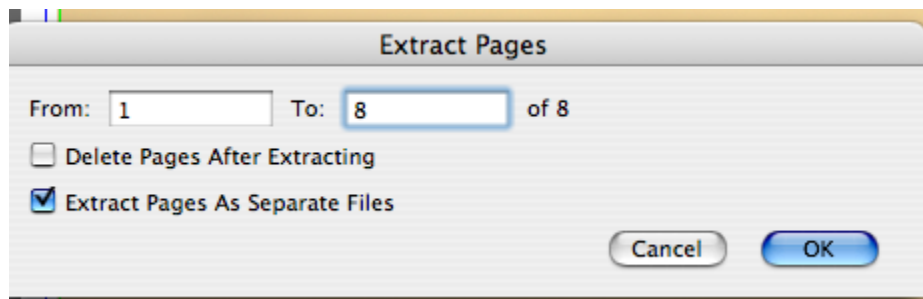

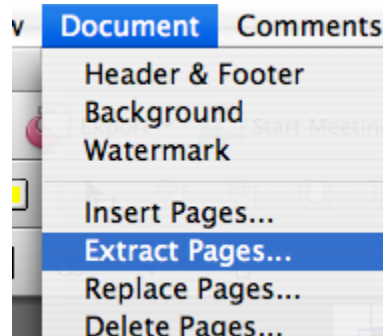

Adobe Acrobat 9 Pro

CAUTION: Due to compatibility issues, extracting pages is only recommended for PDF files created by Adobe applications. Extracting pages generated by non-Adobe applications is NOT recommended.

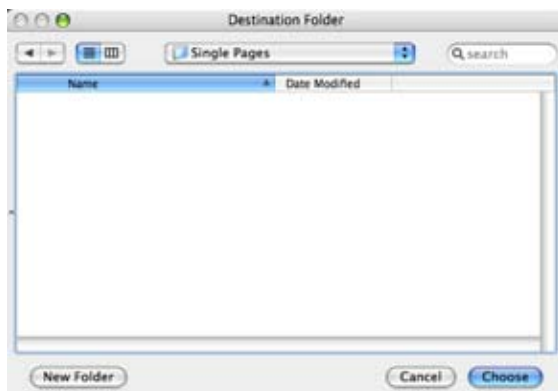

1. File / Open

2. Extract Pages:

3. Choose Destination Folder.

4. Files will need to be re-named for Prinergy automation. See tech note 51 For file renaming options
